[Oemu-devel Machine Menu Patch For Mac](#)

Patients/Studies

BARNIG MARCO	Thorax Thorax_SAFIRE
1951/01/29	2014/05/18 19:49:52

Main top toolbar

- Shows the file manager view, with it you can open or manage images or import files from web browser or from Dropbox storage.
- Shows the database view, with it you can view and open the archived files in the classical hierarchy patient/study/series/images.
- Opens previous image presents in the same folder or database search.
- Opens next image presents in the same folder or database search.
- 100%** Displays the zoom percentage, one tap on it sets the actual size of image.
- Shows/hides a panel where you can change the image window center (brightness) and window width (contrast). This contains a slider control and a padlock button that allows you to block the brightness/contrast (if closed) when switching between images.
- Resets the default values of the image, such as window center and window width.
- Changes multiview modality, it allows you to display 1, 2, 4 or 6 frames or images at the same time. The current active view is highlighted with a lighter gray frame. This button is always in center of top toolbar.
- Shows/hides a panel where you can export the image. Saves a screenshot as JPEG or PNG image, this can be chosen in the application preference or prepares an email with attached the current frame as image, some parameters of this email can be set in application preference.
- Shows the header of DICOM image currently displayed.
- Shows the main DICOM attributes in the

file 1/3
